

## Research Seminar II

**Code:** 66702

**Character:** Compulsory

**Credits:** 4

**Type:** Theoretical

**Hours by week:** 2

### Hours

**Theory:** 2

**Practice:** 0

### General Objective:

Carry out a student's research Project, agreed upon with the supervisor.

### Specifics objectives:

This activity is performed under supervision from the principal tutor. The purpose of this seminar is to carry out a specific Research Project in order to train the student in practical and hands on Research activities in the topic chosen by the supervisor and student under mutual agreement. The Research topic is open and subject to the interest of the student and supervisor and it is expected that it may lead to a Research paper or innovation procedure.

### Unit 1

The research seminar consist in weekly meetings with students and senior tutor, they will discuss and consider different aspects associated with research work that the student has done. A definition of the scope, timeline, Project management and goals is a prerequisite to start this seminar.

**The seminar will be evaluated based on:**

- 1) The quality of the Research carried out by the student, with a prior definition of the scope and goals. Weekly presentations on the advance on the Project, discussions on relevant literature and advanced texts.
- 2) A written report including the semester progress on the research carried out. Depending on the quality of the report, this may be part of a publication in a Journal or may be part of the master graduation Project report.

The calification assigned to research seminar will be approved or not approved.

The bibliography will be depending on the research subject of each student.
